

Technical Coordinator - Biosciences Division

CEM Corporation (Matthews, NC), a leading provider of worldwide microwave instrumentation, is seeking a highly motivated Technical Coordinator to support our Bioscience Division. The position requires a BS/MS in biochemistry, chemistry, or related field, and previous laboratory experience with peptide synthesis is a plus. The job will involve customer support, development of chemistry support materials (presentations, manuals, applications brochures) and communication with other departments including sales and marketing. A good foundation and communication of analytical and organic chemistry are desired. No prior experience with microwave chemistry is required. If you are a self-directed and enthusiastic individual who enjoys partnering with team members in a challenging and dynamic work environment, CEM is the place for you.

CEM offers a competitive salary and benefits package. Email résumé and salary requirements to human.resources@cem.com.

Research Associate - Biosciences Division

CEM Corporation (Matthews, NC), a leading provider of worldwide microwave instrumentation, is seeking a highly motivated research associate to support our Biosciences Division. The position requires a BS in chemistry, or related field with a strong background in biology, and previous laboratory experience is a plus. The research associate will be responsible for carrying out basic laboratory tasks in the field of chemistry, including peptide synthesis, assisting with the development of new microwave applications. No prior experience with microwave chemistry is required. Qualified candidates should have good verbal and written skills, and they should be able to maintain a safe and clean work environment. If you are a self-directed and enthusiastic individual who enjoys partnering with team members in a challenging and dynamic work environment, CEM is the place for you.

CEM offers a competitive salary and benefits package. Email résumé and salary requirements to human.resources@cem.com.

Development Chemist - Synthesis Division

CEM Corporation (Matthews, NC) is looking for a BS/MS level organic/inorganic chemist with research experience. This role will require performing organic and inorganic reactions in the lab, working with a development team to assist in improving and creating novel instrumentation, traveling with sales people to give presentations and technical support, interacting with customers on a technical level, and presenting technical work at conferences. Candidates must have a good knowledge of chemistry, be effective problem solvers, and have a very open personality with good communication skills.
