

**Reviewer ID:**

**Author ID:**

Carefully read your assigned papers and review them according to the following guidelines. Please fill out this form and return them to my mail box. You do not need to return a copy of the paper, unless you have made corrections or suggestions on the paper that you would like the author to see, which is highly encouraged.

Refer to the original handout on this assignment for guidance in your review. In judging the content, remember that I am not looking for an exhaustive review of the literature. Rather, I want a detailed discussion of the mechanism of the reaction, studies to prove this mechanism, and current "state-of-the-art" systems and their applications.

**All reviews must be received by 5:00 PM, Monday April 3<sup>rd</sup>.**

Please check the appropriate response below. Expand on your answers on additional sheet(s).

<b>Writing</b>	Excellent: only minor typos <input type="checkbox"/>	Needs some minor revisions <input type="checkbox"/>	Major problems with grammar or readability <input type="checkbox"/>	
<b>Clarity of Presentation</b>	Well organized and easy to follow <input type="checkbox"/>	Minor reorganization needed <input type="checkbox"/>	Paper is hard to follow and needs major reorganization <input type="checkbox"/>	
<b>Illustrations</b>	Clear illustrations <input type="checkbox"/>	Need more figures <input type="checkbox"/>	Some figures can be eliminated <input type="checkbox"/>	Poor quality illustrations <input type="checkbox"/>
<b>Content</b>	Provides detailed picture of the reaction, including mechanism. <input type="checkbox"/>	Good overview, but needs more detailed mechanistic discussion <input type="checkbox"/>	Paper is too brief to cover material <input type="checkbox"/>	
<b>References</b>	Sufficient references in proper format <input type="checkbox"/>	References not formatted correctly <input type="checkbox"/>	Too few references <input type="checkbox"/>	Too many references <input type="checkbox"/>

**Add additional sheets to comment on your ratings above and to address any other issues of which you feel the Author should be made aware.**
